## SUMMARY

Results-driven Computer Engineering student with a strong foundation in Machine Learning, Generative AI, and DevOps. Experienced in building full-stack applications, training deep learning models, and deploying scalable systems. Eager to leverage my dual skill set in Python and modern containerization for a fast-paced AI/ML or DevOps internship.

## EDUCATION

|                                                                                                                                                            |                                         |

## TECHNICAL SKILLS

- **AI & Machine Learning:** Python, TensorFlow, PyTorch, Scikit-learn, OpenCV, Data Pre-processing, Neural Networks (CNN, RNN), Supervised & Unsupervised Learning.
- **Generative AI & NLP:** Large Language Models (LLMs), Gemini API, LangChain, LangGraph, Retrieval-Augmented Generation (RAG), Agentic AI Systems.
- **DevOps & Cloud Infrastructure:** AWS (EC2, S3), Docker (Containerization), Terraform (IaC), Jenkins, Kubernetes, Linux System Administration, CI/CD Fundamentals, MLOps, Version Control (Git/GitHub).
- **Software Development:** MERN Stack (MongoDB, Express, React, Node.js), Flutter & Dart (Mobile Dev), REST APIs, Microservices Architecture.
- **Languages & Tools:** Python (NumPy, Pandas, Scikit-learn, TensorFlow, Keras), Java, VS Code, Anaconda, Jupyter Notebook, Streamlit.

## PROJECTS

- **Sentiment Analysis Web App** | *Python, Flask, Scikit-Learn, NLTK, SMOTE*  
Engineered an end-to-end NLP web application to classify user feedback as positive or negative in real-time. Built a custom text preprocessing and vectorization pipeline with NLTK, resolved dataset class imbalance using SMOTE, and deployed a Scikit-Learn Logistic Regression model achieving 87.7% testing accuracy to production. | [GitHub](#) 📄
- **No-Code ML Model Training Platform** | *Python, Streamlit, Scikit-learn, XGBoost*  
Developed a no-code Streamlit application automating the machine learning lifecycle, featuring dynamic data pre-processing pipelines for imputation, scaling, and encoding. Integrated XGBoost, SVM, and Random Forest classifiers with automated evaluation and Pickle serialization for seamless model deployment. | [GitHub](#) 📄
- **Plant Disease Image Classifier** | *TensorFlow, Keras, Python, Streamlit*  
Built an end-to-end ML pipeline using CNNs to classify 38 plant diseases. Implemented robust data augmentation for model stability and developed a Streamlit frontend for local user-uploaded image inference. | [GitHub](#) 📄
- **Multimodal Gemini AI Assistant** | *Python, Streamlit Cloud, Google Gemini*  
Developed and deployed on Streamlit Cloud a secure, production-ready multimodal chatbot using the Gemini 2.5 Flash architecture. This application features integrated image captioning, text embedding for semantic search, and all managed through an automated and credential-safe deployment workflow. | [GitHub](#) 📄
- **Machine Learning Projects Repository** | *Scikit-learn, Pandas, Python, Matplotlib*  
Maintained a comprehensive ML repository of 10+ end-to-end projects, including high-impact models for Credit Card Fraud Detection, Parkinson's Disease, and Medical Insurance Prediction. Engineered full lifecycles using SVM, Logistic Regression, and Linear Regression via Scikit-learn, emphasizing robust data standardization and rigorous evaluation metrics for real-world reliability. | [GitHub](#) 📄

RESEARCH PROJECTS

- **An Evaluation of General Machine Learning Techniques for Predictive Modeling** (In Progress) | *Machine Learning, Scikit-Learn, Random Forests, Neural Networks*  
Reviewing and evaluating the efficacy of general machine learning techniques for predictive tasks. Analyzing the balance between accuracy and interpretability across standard baseline models and advanced predictive architectures.

CERTIFICATIONS & TRAINING

- **Supervised Machine Learning: Regression and Classification** | DeepLearning.AI & Stanford University (Coursera)  
Authorized by Andrew Ng; covered foundational machine learning algorithms, including linear regression, logistic regression, and gradient descent for predictive modeling.
- **Advanced Learning Algorithms** | DeepLearning.AI & Stanford University (Coursera) June 2025  
Authorized by Andrew Ng; covered advanced Neural Networks, Decision Trees, and Recommendation Systems.
- **Career Essentials in Generative AI** | Microsoft & LinkedIn April 2025  
Comprehensive learning path covering Responsible AI, Microsoft Copilot, and Generative AI fundamentals.
- **Python for Machine Learning: The Complete Beginner's Course** | Udemy July 2024  
Practical implementation of ML algorithms and data processing using Python.
- **Ethics in the Age of Generative AI** | Project Management Institute (PMI) April 2025  
Focused on computer ethics and the responsible deployment of AI technologies.
- **Linux Systems Administration & DevOps Engineering Training** | WSO2 January 2026  
Hands-on training in Linux system internals, networking, and enterprise DevOps practices.
- **Responsive Web Design Developer Certification** | freeCodeCamp March 2025  
Completed approximately 300 hours of intensive coursework in modern web development.

COMPETITIONS & AWARDS

- 2025 – **Best Innovation Award**, Eminence 5.0 Inter-University Competition, IEEE WIE Affinity Group – University of Ruhuna
- 2025 – **6th Place (Top 10)**, Eminence 5.0 Inter-University Competition; contributed to Machine Learning prediction models for real-world engineering problems
- 2025 – **Competitor (Finalist)**, PERABOTS Robotics Competition. Collaborated with a team to design and program a robot, applying practical control systems to reach the competition finals.

PERSONAL SKILLS

- Strong Analytical and Algorithmic Problem Solving
- Technical Leadership and Initiative in Collaborative Environments
- Creative System Design and Innovative Solution Development
- Active Stakeholder Listening and Precise Requirements Gathering
- Strategic Architectural Planning & Critical Thinking

EXTRACURRICULAR

- Logistic Team Member, IoTrix 2025 Ideathon, organized by IEEE Student Branch, University of Ruhuna – contributed to the design and execution of the event from concept to completion.
- Network Team Member, Rextro Exhibition 2025.
- Member, 'Mehewara' Seminar Series (2024–Present).
